Intense C Serum

Product Description:

QuSome® encapsulated Vitamin C in the form of L-Ascorbic acid in a light-weight serum that penetrates deeply to provide superior antioxidant protection. Patented QuSome technology prevents the Vitamin C from premature oxidation so it can work deep in the skin's layers to stimulate collagen production, defend against UVA/UVB damage, brighten skin and reduce the visible signs of aging.

Skin Types:

Intense C Serum may be recommended for all skin types except oily or acne-prone skin.

Benefits:

- Patented QuSome technology retains vitamin C's restorative properties.
- Stimulates collagen production to improve the appearance of fine lines.
- Defends against damaging UVA/UVB rays.
- Brightens skin and visibly reduces the signs of aging.

AM Care Directions:

Apply sparingly (3-4 drops) to face using fingertips. Massage gently. Allow to absorb completely before applying hydration products or make-up. May be used on neck and décolletés.

Featured Ingredient:

7.5% L-Ascorbic Acid - A powerful antioxidant that prevents free radical damage, defends against the sun's damaging rays, stimulates collagen production and helps prevent the signs of aging.

Complete Ingredient Listing:

Propylene Glycol, Ascorbic Acid, Lecithin, Polyacrylamide, C13-14 Isoparaffin, Laureth-7, PEG 12 Glyceryl Dimyristate.
