

Professional Use Products

Esterified Glycolic Acid Facial Applicators

Product Description:

Professional grade esterified glycolic acid peels used to reduce mild to moderate signs of facial aging. Recommended for skin with mild to moderate photo-damage, lines, wrinkles and/or mild scarring. May be used for acne-prone skin. Suitable for use on face, décolleté, back, and top of hands.

Skin Types:

Generally suitable for all skin types and skin colors.

Benefits:

- Enhances cellular turnover.
- Reduces corneocyte cohesion and keratin plugs.
- Promotes collagen deposition and elastin production.
- Stimulates additional hyaluronic acid production.
- Minimizes the appearance of pigmentation irregularities.
- Softens fine lines.
- Creates brighter, plumper skin that looks and feels firmer, smoother and more supple.

Directions:

See, *GlyDerm Esterified Glycolic Acid Facial Applicators Instruction for Use*. For application by Physicians and licensed professionals as set forth in relevant state regulations.

Featured Ingredients:

Glycolic Acid - Originally derived from the sugarcane plant, glycolic acid has proven anti-aging and exfoliating properties. Glycolic acid reduces corneocyte cohesion by dissolving the cellular cement that bonds skin cells together creating a better organized, more compact stratum corneum. It also promotes collagen deposition to improve firmness and boosts hyaluronic acid to increase moisture content. The result is softer, smoother skin that looks brighter and younger. GlyDerm is formulated with a proprietary form of esterified glycolic acid to minimize irritation without compromising effectiveness.

Citrus Medica Limonum (Lemon) Fruit Extract - Clarifies the skin, has anti-inflammatory properties and is a natural source of Vitamin C.

Complete Ingredient Listing:

Esterified Glycolic Acid Applicators - Water, Glycolic Acid, *Citrus medica limonum* (Lemon) Fruit Extract.
